

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. CATALOGUE
OF THE
BABYLONIAN CUNEIFORM TABLETS
IN THE
PRINCETON UNIVERSITY LIBRARY

Compiled by
EDWARD CHIERA, Ph.D.

PRINCETON, N. J.
THE UNIVERSITY LIBRARY
1921

PREFACE

The beginning of the collection of Babylonian cuneiform tablets and seal cylinders was made in 1897, when the late M. Taylor Pyne, of the class of 1877, to whom the University and its Library owes so deep a debt of gratitude, had his attention called to a collection of some 280 tablets and 80 cylinders, offered for sale by Daniel Z. Noorian of New York.

This collection was recommended by the late William Hayes Ward, in the following terms:

"The seals I know thoroughly and have described for you. The tablets are of great antiquity, some of them as old as Abraham, or older, and they ought to be copied, translated and published. Such tablets are the chief treasure of the Oriental department of the British Museum, and they bring to it every year a host of Semitic students from Germany and America. I am very desirous that such collections should be drawn to this country, that our own oriental scholars may have the material for original research along these lines, which, more than any other, have now for forty years been both illustrating and confirming Scripture history, and giving us our best insight into the beginnings of human civilization in the very region which was the cradle of the race."

A large part, if not all, of this collection of Noorian's was purchased and presented to the Princeton University Library by Mr. Pyne and Mr. Junius S. Morgan (Class of 1888).

A considerable addition (623 tablets) to the collection was made in 1912-1913 by the late Professor Rudolph Ernst Brünnow, Mr. Pyne and other friends and alumni of the University. The complete list of donors is as follows:

Rudolph Ernst Brünnow,
Sheldon Franklin, Class of 1903,
Robert Garrett, Class of 1897,
Kenneth Campbell Kirtland, Class of 1893,
Cyrus Hall McCormick, Class of 1879,
John Leverett Moore, Class of 1881,
Russell Wellman Moore, Class of 1883,
Charles Allen Munn, Class of 1881,
Richard Wayne Parker, Class of 1867,
Moses Taylor Pyne, Class of 1877,
Simeon H. Rollinson, Class of 1893,
Miss Edith Ward,
Martin Dasher Wylly, Class of 1875.

In the same year another collection consisting of 35 tablets was presented by Wilfred John Funk, Class of 1909, and George William Gilmour, Class of 1883.

The latest, as the earliest, gift was from Mr. Pyne—three tablets, presented during the year 1913-14.

The cylinder seals are as yet uncatalogued with the exception of 58, of which we have a description in manuscript by Mr. Ward.

For this catalogue of the tablets, the Library was fortunate in securing the services of Dr. Edward Chiera. Dr. Chiera makes the following introductory remarks to his catalogue:

“The largest majority of the Documents belong to the period of the Ur Dynasty or, to be more precise, to that of the Fifth Dynasty of Ur. Their provenance is Telloh, Yokha, and Drehem. The name of the month in the date formula is noted in every case, for its evidence as to the provenance of the individual documents, inasmuch as each of these three cities had its special calendar.

As a matter of course, this catalogue does not undertake to offer to scholars the interesting points of the documents it describes. It is to be hoped that it will be possible to publish all of those which deserve publication. A good start has been made in this direction and a volume of selected texts has already been prepared and will be published in the near future.”

As was announced in the Report of the President for 1919, the Princeton University Library wishes to make this small contribution to oriental studies a memorial to Professor Brünnow. To his voluntary services and gifts the University owes the beginnings of its Oriental department. To his friends it is indebted for the funds used in the development of the department and, after his death, for the gift of the Brünnow library.

Assistant Librarian.
